

CYBERSECURITY SOLUTIONS

SECURE BY DESIGN. TRUSTED BY ENTERPRISES.

PROTECTING YOUR BUSINESS, DATA, AND REPUTATION.

Who We Are

A technology partner trusted by enterprise clients across more than 32 countries. Our cybersecurity practice helps organizations protect critical systems, safeguard sensitive data, and meet today's regulatory and compliance demands.

We unite offensive security expertise, recognized certifications, and managed services into one accountable partnership meeting you where you are and growing with you.

32+

Countries served worldwide

1

Accountable partner across the program

End-to-end

Strategy, certification & managed defense

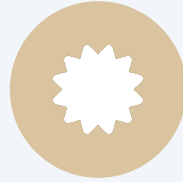

Our Services at a Glance

Cybersecurity Consultation

Advisory & strategy that align security with business goals.

ISO 27001 Certification

End-to-end support to achieve & maintain ISO 27001:2022.

SafeGuard · EDR

Managed endpoint detection & response across your estate.

SafeGuard · Dark Web

Continuous monitoring for leaked credentials & exposed data.

SafeGuard · VAPT

Vulnerability assessment & penetration testing of your assets.

Cybersecurity Consultation

Strategic, vendor-neutral advisory that turns security risk into business language giving leadership a clear, prioritized roadmap.

WHAT WE DELIVER

- Security posture assessment & gap analysis (ISO 27001, NIST, CIS).
- Risk assessment with a prioritized, budget-aware remediation roadmap.
- Security policies, standards & procedures tailored to you.
- Architecture and cloud security reviews.
- Virtual CISO (vCISO) advisory & ongoing governance.
- Security awareness guidance for staff and leadership.

WHY IT MATTERS

Invest with intent

Make informed security investments instead of reacting to incidents.

Prove due diligence

Demonstrate it to customers, partners, and regulators.

Senior expertise on demand

Without the cost of a full-time hire.

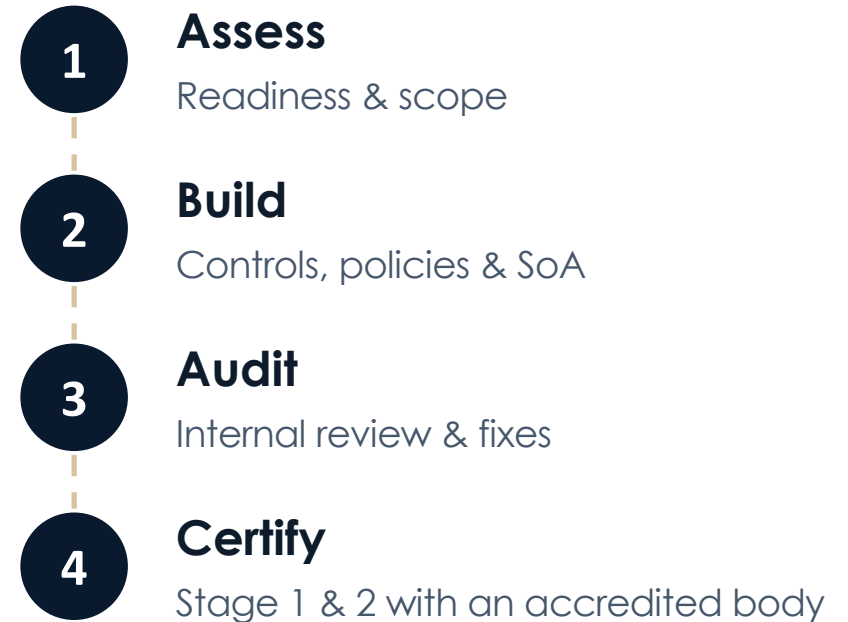

ISO 27001 Certification

End-to-end support to design, implement, and certify an ISMS aligned to ISO 27001:2022, the international standard for information security.

WHAT WE DELIVER

- Readiness assessment & scoping of your ISMS.
- Statement of Applicability, risk treatment plan & full policy set.
- Implementation of required controls, processes & documentation.
- Internal audit, management review & corrective action.
- Disaster recovery and incident response planning & testing.

THE ROAD TO CERTIFICATION

Why it matters: Achieve certified information security to win enterprise and government contracts, build customer trust through independent verification, and maintain a repeatable, audit-ready security management system.

SafeGuard Packages

SafeGuard is our managed security suite: a set of operational services that actively protect, monitor, and test your environment day to day. The three pillars below can be delivered individually or as a combined program.

EDR

Endpoint Detection & Response

Real-time protection that goes beyond antivirus to detect, investigate, and respond.

Dark Web Monitoring

Exposure Surveillance

Continuous watch over marketplaces, forums & breach dumps for your exposed data.

VAPT

Vulnerability Assessment & Pen Testing

Hands-on offensive testing that finds, exploits, and helps you fix real weaknesses.

Endpoint Detection & Response (EDR)

Advanced, managed protection for laptops, desktops, and servers that goes beyond traditional antivirus to detect, investigate, and respond to threats in real time.

WHAT WE DELIVER

- Deployment & tuning of a leading EDR platform across your endpoints.
- 24/7 detection of malware, ransomware, and suspicious behavior.
- Threat investigation, containment, and guided remediation.
- Regular reporting on endpoint health and threat activity.

WHY IT MATTERS

- ✓ Stop ransomware and advanced threats before they spread.
- ✓ Gain visibility into every endpoint from a single console.

Dark Web Monitoring

Continuous surveillance of dark web marketplaces, forums, and breach dumps for your organization's exposed credentials and sensitive data, so you can act before attackers do.

WHAT WE DELIVER

- Monitoring of corporate domains, executives, and key assets.
- Alerts on leaked credentials, exposed data, and brand impersonation.
- Validation & prioritization of findings to cut out the noise.
- Recommended response actions for each confirmed exposure.

WHY IT MATTERS

- ✓ Reset compromised credentials before they are abused.
- ✓ Reduce account-takeover and business email compromise risk.

Vulnerability Assessment & Penetration Testing (VAPT)

Hands-on security testing by experienced offensive security specialists who identify, exploit, and help you fix real-world weaknesses across your applications and infrastructure.

WHAT WE DELIVER

- Web, API, mobile, and external / internal network testing.
- Authentication & SSO assessments (OAuth, Keycloak, and more).
- Manual exploitation to confirm real risk not just scanner output.
- Clear, evidence-backed reports with reproduction steps & fixes.
- Remediation guidance and optional retesting to verify closure.

WHY IT MATTERS

- ✓ Find & fix vulnerabilities before attackers exploit them.
- ✓ Satisfy compliance, customer, and partner requirements.
- ✓ Actionable findings, ranked by real business impact.

Why Safa Soft

Proven offensive expertise

Disclosures acknowledged by leading global organizations.

Enterprise track record

Serving clients across 32+ countries.

End-to-end coverage

Strategy & certification through testing & managed defense.

Business-focused reporting

No jargon just clear, prioritized actions.

One accountable partner

Across consulting, compliance & managed services.

Next Steps

01

Discovery call

We understand your environment, priorities & goals.

02

Tailored scope

We design a scope & proposal that fits your needs.

03

Engagement

We deliver, with clear pricing & packaging.
